- Passionate about mobile applications, native and web

Publications

WiFi-USB - IoT Device with App client

GitHub - <https://github.com/EPICmynamesBG/WiFi-USB>

Authors/Developers: Brandon Groff

About: I built a custom IoT device using an ESP8266 to wirelessly toggle the power of any connected USB powered device. To accompany, I designed and developed a native iOS app and web controller that can use HTTP requests or WebSockets to toggle the power.

Platforms

- Android
- iOS

Development Languages

- Swift
- Javascript
- CSS/SASS
- HTML
- SQL/mysql
- PHP
- Java
- Objective-C
